### **Did You Know**

- Chickpeas, also called garbanzo beans, have been enjoyed as a nutritious food source for 7,000 years. The name chickpea comes from their similarity of appearance to a chick's beak.
- Like other legumes, chickpeas have root nodules that fix nitrogen, which helps to improve the soil. This bushy plant varies in height from 8 inches to 3 feet and grows best in dry climates. Each pod contains 1-3 chickpeas.
- Montana's production of chickpeas is growing. In 2016, Montana farmers harvested 254,000 acres of chickpeas.

## **Nutrition Information**

Chickpeas are a nutrient powerhouse. They are an excellent source of many nutrients including potassium, calcium, iron, vitamin B-6, and magnesium. Magnesium can help prevent migraines, ensure strong bones, regulate blood pressure, and manage blood sugar among many other important functions in the body. Like other legumes, they provide protein and fiber. In 1 cup of chickpeas, there are 39 grams of protein! Fiber is important for a healthy digestive system, lowering cholesterol, and helping to manage weight.
